SUMMARY

UI/UX Designer with 4 years of experience designing web and e-commerce interfaces at an agency managing 140+ active brands. I focus on UI and visual design: visual hierarchy, components, design systems and responsive layouts in Figma. I work directly with clients, from gathering requirements to presenting and iterating on solutions, and alongside developers through implementation. Advanced HTML and CSS, basic JavaScript and AI-assisted development let me design with states and technical constraints in mind, run visual QA and handle UI implementation when scope allows. Background in graphic design; currently expanding into UX and product design.

SKILLS

- **UI & Visual Design:** visual hierarchy, typography, layout, web and mobile interfaces, responsive design (desktop, tablet, mobile), digital campaign assets
- **Design Systems:** components, variants and states, Atomic Design, visual consistency
- **UX:** wireframing, prototyping, interface structure, interface simplification, requirements analysis
- **Design-Dev Collaboration:** developer handoff, specs, visual QA, UI implementation in HTML/CSS
- **Client-Facing Work:** requirements gathering, design presentations, feedback management

EXPERIENCE

UX/UI Designer • eCommerce Specialist — Wuala (e-commerce agency) • Sep 2022 – Present

Agency managing 140+ active brands on Shopify, Tienda Nube and PrestaShop, serving B2B and B2C clients in pharma, labs, fashion, construction and auto parts.

- Design and redesign interfaces (home pages, landing pages, product pages) for desktop and mobile in Figma, solving visual hierarchy, consistency and responsive issues.
- Handle client requests directly: identify the interface problem, propose a solution, present it and iterate on feedback through approval.
- Build reusable components with variants and states, applying design system and Atomic Design principles to keep interfaces consistent across sections and sites.
- Contributed to the design of three custom PrestaShop modules (stock indicators, search filters, checkout) and built working prototypes using AI-assisted development.
- Work with developers on handoff, technical feasibility and visual QA of the build.
- Implement UI adjustments in HTML/CSS and PrestaShop Smarty (.tpl) templates via FTP, and work on WordPress/Elementor sites.
- Design banners and campaign assets adapted to multiple formats and devices.

Customer Support & Quality Control — Apex America (telecom account) • 2016 – 2022

- Provided technical support to users via chat, WhatsApp and phone.
- Quality control analyst (3 months): reviewed support interactions to identify process errors.

EDUCATION

- **Higher Technical Degree in Graphic & Advertising Design** — Instituto Superior Mariano Moreno • 2014
- **Advertising & Marketing Analyst** — CEICOS • 2017
- **Front-End Development Bootcamp (incl. React)** — Coderhouse • 2022
- **Shopify Development Fundamentals** — Shopify • 2026
- **In progress:** Google UX Design Certificate (Coursera) • Meta Front-End Developer Certificate (Coursera)

TOOLS, TECHNOLOGIES & LANGUAGES

- **Design:** Figma, Adobe Creative Suite, AI tools for design
- **Front-end:** HTML & CSS (advanced), JavaScript (basic), React (coursework), AI-assisted development
- **Platforms:** PrestaShop (Smarty/.tpl), Shopify, Tienda Nube, WordPress, Elementor
- **Languages:** Spanish (native) • English (B1)
